Wireless Network Access for Guests

Connect to the wireless network with the SSID "**conference**" and open an arbitrary web page. Instead of that page a form will appear, which asks for the following key: h4vk7r6x

Note: For technical reasons the connection to the wireless network may be interrupted at midnight. The key is also valid for the following day and must be re-entered in order to continue using the wireless network.

Attention: Connections to the wireless network "conference" are not encrypted and can be eavesdropped. To ensure confidentiality and encryption, please use appropriate protocols (https, ssh, VPN).
